BENEFITS

Extender for Microsoft Dynamics GP

Customize data collection. Link extra windows to any Microsoft Dynamics GP form, even those from third-party products. With a choice of field types, you can fine-tune your interface to capture the data you need.

Tailor data entry. Add lookups, create templates, and easily collect additional information pertinent to your business.
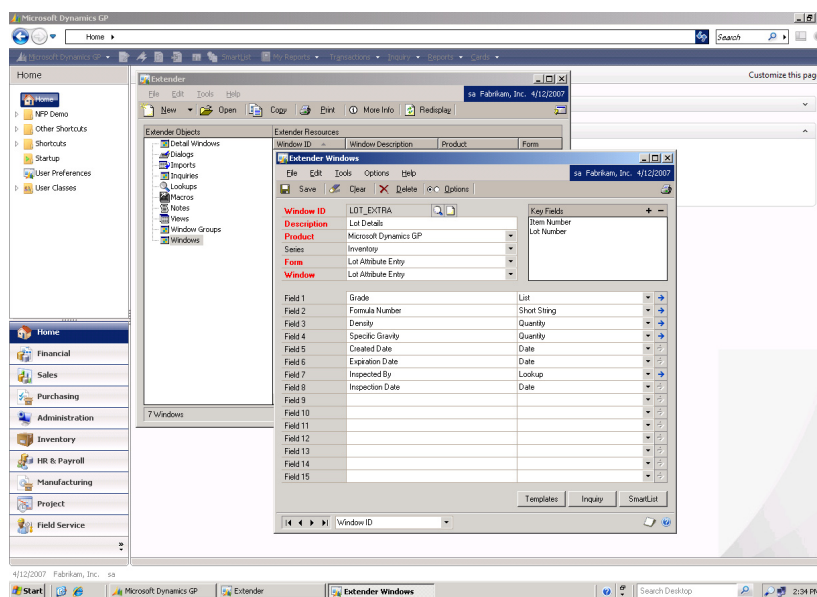

Increase visibility into data. View your data in infinite combinations and formats. Consolidate information from any Microsoft Dynamics GP or third-party table to view relevant details and data subsets on demand.

Ensure fast access to relevant data. Create lookups that meet your business and industry needs. Lookups empower your people to access the data that matters, from anywhere at any time.

Optimize data analysis. Microsoft® SQL Server™ views simplify the process of retrieving data and preparing it for third-party reporting applications. Export views to Microsoft Office Excel® to reuse elsewhere.

Capture information that meets your needs and make fast, easy modifications without writing code. Extender for Microsoft Dynamics™ GP incorporates powerful features that enable you to link additional windows, expand notes and macros, and easily launch ad hoc queries based on the new business information that you've collected.

EASILY ADD fields, notes, macros, and more to any Microsoft Dynamics GP window.

Microsoft Dynamics™ GP

FEATURES   EXTENDER

Extender Windows	• Assign multiple windows to any form and gain instant access to lookups and subforms as you work. Easily attach new data entry windows, notes windows, and even new inquiry windows to existing Microsoft Dynamics GP windows—without writing a line of code. • Detail windows enable you to track multiple transactional line items for each master record.
Automation and Navigation	• Extender makes data entry and navigation fast and intuitive. Automatically open and close extra windows as you navigate through a form and apply window templates to set default values for fields. • Windows Groups enables users to open multiple Extender notes, windows, or detail windows from a single menu item. Users can set conditions to ensure that specified windows open automatically. • Move/Swap Fields allows you to move fields around on an Extender window or detail window while maintaining the integrity of your data.
Extender Notes	Track specific issues by attaching multiple notes to any Microsoft Dynamics GP window. Export notes to Office Excel, build note-based inquiries, and create read-only notes for security purposes.
Extender Views	Extender offers consolidated views of information from Microsoft Dynamics GP tables and Extender windows, combining them into a concise, comprehensible format. Employees can take advantage of these easy reporting options to use Extender data with reporting modules such as Crystal Reports.
Extender XML Import/Export	Harness the power of XML integration to maximize data portability. You can export Extender setup configuration data to an XML file to share both the data and the display commands with other XML-compliant applications. You can also import XML files to deliver Extender solutions through the interface of your choice.
Table Synchronization	Maintain data integrity by removing Extender records when corresponding Microsoft Dynamics GP records are removed. Records are also removed when Extender windows are deleted.

Extender is a separate purchase and is available for all Microsoft Dynamics GP product lines.
