

# Microsoft Dynamics™ Professional Services Tools Library‡

## Consolidate and Change Critical Data Faster and Easier with Accuracy

The Professional Services Tools Library provides greater flexibility with your solution. These tools ensure data integrity, increase productivity and efficiency.

### Why add Tools from the Professional Services Tools Library to your system?

The answer is simple! These tools are quick, affordable solutions for consolidating, and changing data within your system. Each Tool provides an efficient, productive solution specific to your needs. Users can click one button to change data throughout the system without manually keying in the data at every location.

### Customers can save with a 3-pack or entire library purchase.

The entire library of Professional Services Tools offers you a complete assortment of data customization and control utilities. You can save money by purchasing a 3-pack or the entire tool library!

### Does my business need a single tool, a 3-Pack or the entire Library?

We expect most customers will need all these tools, but some customers may require only three, while others may call for a single tool to effectively resolve one critical change of data. To keep Microsoft Dynamics™ GP and Microsoft Dynamics™ SL affordable and manageable for every small to mid-size business, the Library of Professional Services Tools is made available separately. You can choose to purchase every tool in the library at one low cost, the three that provide solutions for your businesses' most common needs or a single tool.

The Professional Services Tools Library is easily distributed and affordably priced. We continually evaluate every tool. This helps us determine if it should be included with a new release of Microsoft Dynamics GP and Microsoft Dynamics SL. Before a tool becomes a part of the core product, we consider three things: (1) customer demand (2) level of service required for deployment (3) cost impact of the code.

	Microsoft Dynamics GP		Microsoft Dynamics SL	
	US	CAN	US	CAN
Entire Professional Services Tools Library	\$5,000	\$6,750	\$4,000	\$5,400
3-Pack of your choice	\$2,000	\$2,700	\$2,000	\$2,700
Individual Tools (unless otherwise noted)	\$750	\$1,013	\$750	\$1,013
Account Modifier/Combiner	\$1,000	\$1,350	n/a	n/a
Master Record Trigger Tools	\$1,500	\$2,025	n/a	n/a

‡ Partners receive the PSTL tools at no cost if for own use. If the customer purchases the tools directly from Microsoft, partner still receives standard product discount.

These tools are available to customers in North America who use Microsoft Dynamics™ GP or Microsoft Dynamics™ SL. To order, you must be enrolled in a current Service Plan for Microsoft Dynamics. However, purchasing any or all of the Professional Services Tools Library will not increase your system list price, or count toward your Enhancement Program or support plan renewal calculation. You will not receive the Professional Services Tools Library with your Enhancement Program updates and upgrades. If you acquire Professional Services Tools Library 60 days prior to a new release, you will receive the latest version at no additional charge. Owners of previous versions of Professional Services Tools Library can purchase the latest version for 16% of list price. Professional Services Tools are non-refundable and non-returnable.
